### 📁 PROJECTS

#### HIMUDA

An Employee Provident Fund Calculation System

June 2023 – July 2023

- An Employee Provident Fund Calculation System with Fully Responsive Single Page DashBoard.
- Himuda is a himachal goverment body project in which they need a complete system which can calculate the PF for the employees. There are alot of functionalilities for the employee and admin. Employee can check their amount, withdraw the amount etc.
- Admin can add employees, add amount, Adjust the interest etc.
- On the basis of these data, system will generate variety of reports which are usefull for both admin & employees.

#### Bank's Self OnBoarding

Self OnBoarding Mobile Screen Web App

December 2022 – February 2023

- Developed a mobile-optimized self onboarding web application for Bank using HTML5, CSS3, Bootstrap 5, JS, and jQuery. Implemented a fully responsive design, ensuring seamless functionality and user-friendly experience across various mobile devices.
- Collaborated with UX/UI designers to translate design mockups into interactive and visually appealing user interfaces. Utilized CSS3 and Bootstrap 5 to style components, resulting in an intuitive and modern frontend design.
- Ensured cross-browser compatibility by thoroughly testing and optimizing the web app's frontend. Implemented browser-specific CSS and JavaScript solutions to deliver a consistent experience to users using different browsers.

#### PERSONAL PORTFOLIO

personal portfolio for Myself on React.js

July 2023 – present

- Collaboratively building a personal React.js portfolio with guidance from experienced seniors and friends to accelerate learning.
- Leveraging the support of React.js community members to create an impactful and knowledge-enriching portfolio.
- Embracing mentorship and teamwork to craft an impressive showcase of projects and skills for professional growth in React.js development.
